

## Reflection

### **1. Introduction**

- Important key data at a glance (date, place, participants)
- What was the goal of the portfolio work?

### **2. Body**

#### 2.1 Reflection of the work at the stations

- What was easy for you? What was difficult?
- Which station was most important to you?
- Which attempt did you find particularly exciting?

#### 2.2 Reflection of the correction of the results

- Where did you correct your solutions after the meeting or after looking at the sample solution? Find a mistake and describe in detail what you misunderstood, what helped you understand it, and how it made you feel

#### 2.3 Reflection of the design task

- Describe how exactly you got involved in the group when working on the design task. Did you record any ideas? Tried with the materials? Did you point out physical effects?
- What do you think went well, what didn't?
- Are you overall satisfied with the exhibition materials? Where do you think you could improve them a bit?

### **3. End**

- How did you like the portfolio work overall? Should such a series of lessons be held again in the grade among you? Name pros and cons
- What would you do differently if you experienced the series again?
